Shiraz, Fars Province, Iran

## SKILL

- Go (Programming Language)
- Backend Development
- API Design & Integration
- Distributed Systems

## AWARDS

- Professionalism, Enthusiasm and Ownership at Snapp! Stars 2024
- Hardworking at Snapp! Stars 2023

## INTERESTS

- Critical Thinking
- Problem-Solving
- Clean & Readable Code

## HABBITIES

- Real-Time Strategy Games
- Board Games
- Reading Codes
- Reading
- Gathering
- Ideation

## PROFILE

I am passionate about writing clean, simple, and highly readable code. My interest in the Go programming language stems from its simplicity and well-thought-out design. I enjoy working with teams where ideas are shared and improved to create great solutions.

With an energetic and optimistic mindset, I always strive to maintain a positive team spirit. As an extrovert, I enjoy teamwork and gain energy from engaging with others.

## EXPERIENCE

### ○ Software Engineer

Snapp! April 2020 to Present

As a Software Engineer, I contributed to building and optimizing company features while focusing on performance improvements. I worked on scaling backend services to handle over 1,000 rps, ensuring efficiency and reliability. Additionally, I enhanced our monitoring and observability systems to provide better insights into service health and performance.

- Backend Development
- Monitoring (ELK & Open Telemetry)
- Kubernetes & Distribution Tools

### ○ Software Engineer Intern

Snapp! Jul 2021 to April 2021

As a Software Engineer Intern, I gained hands-on experience in backend development. I explored various backend services to understand their roles and interactions, while also learning how to build services in Go. I wrote test cases to ensure code reliability.

Beyond technical skills, I actively participated in team collaborations, learning Agile and Scrum methodologies. This internship helped me improve both my technical expertise and teamwork abilities in a real-world development environment.

- Backend Development
- Scrum & Agile
- API Integration
